For Immediate Release
TECH BIZSOLUTIONS NAMED RESELLER OF DIGISOFT SOLUTIONS SOFTWARE

Web-based Products for Federal Contractors Accommodate Business Management Functions

Longmont, CO

Tech BizSolutions of Longmont, Colorado, has entered into a reseller agreement with Digisoft Solutions to provide its business management software to government contractors.

Digisoft Solutions software offers a comprehensive, integrated, and affordable solution incorporating the following features:

- Web-based timekeeping
- Job cost and indirect rate reporting
- Proposal planning and pricing
- Material and property management
- Contract & project management
- Expense management

The Digisoft Solutions software integrates with desktop versions of QuickBooks accounting software. Its timekeeping, job costing, and indirect rate reporting functions allows government contractors the ability to pass critical governmental review and audit processes.

“The Digisoft Solutions products will allow our small and medium sized clients to remain compliant with government rules,” said Tech BizSolutions President Brian Sperry, “and at the same time enhance their productivity.”

Dave Neumann, president of Digisoft Solutions, said, “We’re excited having Tech BizSolutions represent and sell our products. Their knowledge of the government market is fantastic and their reach is nationwide.”

Government accounting requirements

Federal Acquisition Regulations (FAR) require an “approved” accounting system for contractors having cost-reimbursement type contracts or ones providing progress payment financing. The government imposes precise rules surrounding accounting systems and operations in this contracting environment. Specifically, the FAR requires job cost accounting and development of indirect expense rates.

The government deploys auditors to examine contractor accounting systems and make recommendations for approval to contracting officers. Caught unprepared, current and first-time government contractors can be temporarily barred from lucrative contract opportunities.

“Many small and medium size businesses use QuickBooks financial software since it is one of the most affordable and easiest-to-use desktop accounting solutions on the market,” explained

Sperry. "The Digisoft Solutions system integrates easily with QuickBooks and is equally affordable and scalable."

Added Neumann, "Our product revolutionizes business and project management software in support of the sophisticated needs of the mid-size company as well as the basic needs of the start-up at the lowest prices in the industry."

About Tech BizSolutions

Tech BizSolutions provides consulting, services, and products to clients nationwide requiring assistance with their government contract and accounting needs. Their capabilities range from accounting to contract administration, financial management to CFO level support. They routinely help clients with their government audit support, financial management, and business development issues. Visit www.techbizsolutions.com.

Digisoft Solutions

Digisoft Solutions provides business management solutions to small and mid-size companies whose primary customer is the federal government. They offer a variety of solutions whose purpose is to simplify business operations, ensure compliance with government regulations, enhance productivity and, ultimately, save clients valuable time and money.
